Price LIBRARY,

Washingt Trees

and Plants

FEB 8 1913

1913?

For Sale by

Elmer Reeves

The Waverly Nurseryman

Waverly, Iowa

Northwest of I. C. Depot.

Telephone, No. 375

In making these prices I expect to meet any reasonable competition and will gladly correct all mistakes made and replace trees that are unsound or not in good condition when delivered. I want your trade, and can and will do better by you than traveling salesmen can possibly do. Trees will be packed and delivered at depot or express office at rates given in this list, but on large trees the cost of box will be charged. Terms are cash before shipment unless otherwise arranged. Certificate of Nursery Inspection furnished with each order shipped. Write for prices on large orders.

APPLES.

My apple trees are grown by grafting long scions on apple roots grown on my own grounds. This is the method that experience has shown to produce the best trees. The varieties are the hardiest and most valuable for this climate, and all trees are absolutely true to name.

All trees should be planted firmly in well prepared ground. Do not expect a tree tp do well where a hill of corn will not grow and mature well. I make the uniform price on apple of \$20 per 100 and allow the customer to make his own selection of varieties and sizes of trees. I have all sizes of most sorts up to six feet above ground when planted.

SUMNER VARIETIES

Duchess—Hardy and an early and abundant bearer and good cooker.

Yellow Transparent—Earliest and best eating, fruit white and

juicy.

Tetofsky—A choice early apple for cooking and eating.

Red Transparent—Like Yellow Transparent, but striped with

Sumner Pear—A new summer apple of excellent quality for eating. One of the hardiest.

FALL VARIETIES

Wealthy—The most valuable of all the apples for this section. Hardy and a rapid grower. Fruit red, juicy and delicious.

Longfield—Very early and abundant bearer of choice eating ap-

Patten's Greening-Very hardy, an abundant bearer of large, flat, green fruit of best cooking quality.

Eastman—A seedling of Fameuse that will rival Wealthy in size, appearance and value.
Wolf River—The largest apple grown. Bright red and showy.

Hardy.

Honey Sweet—A new sweet apple of choice quality and bears

WINTER VARIETIES

Northwestern Greening - Fruit large, greenish yellow and smooth. Tree thrifty and an abundant bearer.

Windsor Chief—A good grower and bears yeung. Fruit large, red and of choice quality. Keeps well.

Gano—Like Ben Davis but a hardier tree and better fruit. Tolman Sweet—Hardy and the best long keeping sweet apple. In addition to the above I have Peerless, Iowa Beauty, Hibernal, Spear, Fameuse or Snow, Black Oxford, Melinda, Salome, Grimes' Golden, Delicious, Jonathan, King David and many others

in small supply. Of crabs I have Whitney, Hyslop, Minnesota, Mercer and Bri-

ars Sweet.

PLUMS.

DeSoto—Red and Yellow and of choicest quality. Bears abundantly.

Wyant-Early, dark red and a freestone of excellent quality.

Forest Garden—Early, large and delicious. Miner—Late and one of the old standards.

The above are of the hardy sorts. I have also several varieties of the blue and yellow sorts that are less reliable, but of choice quality. All plums 40 cents each. Ask for price on hundred lots.

CHERRIES.

Early Richmond, Montmorency and English Morello are best.

Four to five feet. 40 cents. Compass—A cross between plum and cherry, ripe in August. Three to four feet. 25 cents.

PEARS.

Flemish Beauty and Keiffer. These have proven best and all should try a few trees of this choice fruit Each 40 cents.

CURRANTS.

Victoria, Red Dutch and White Grape. Among the large number of sorts that I have tried these prove best. Two year

GOOSEBERRIES,

Downing and Champion—Large and green when ripe and of good quality. Two year roots, each 10 cents. Per 100, \$8.

GRAPES.

| | Each | Per 100 |
|---|------|---------|
| Moore's Early—Large, early and choice quality | .10 | \$6.00 |

|---|-------|---------|
| Older, Gregg and Ohio - The best black variety | .50 | \$3.00 |
| Turner. Cuthbert and Iowa—The reliable red sort | .35 | 2.00 |

BLACKBERRIES,

| Snyder and Ancient | Britton | .50 | \$.300 |
|--------------------|---------|-----|--------|
|--------------------|---------|-----|--------|

STRAWBERRIES.

Having tried many varieties of this fruit I have learned that but few meet all the requirements, and have decided that the following are best. These are perfect in bloom and will bear a full crop when planted alone. They produce a large crop of choice berries of dark color and are best for the farmer who grows only for family and for the grower for market. I have other sorts, but these are best. The everbearing varieties will be the popular ones in a few years, but cannot be bought now at prices that can be afforded.

ASPARAGUS,

Conover's Collosal, two year roots...... 10) for \$1; 1,000 for \$4.
